

# THE ULTIMATE ALL SEASON SALT REMOVER AND METAL PROTECTOR

[TopDogServices.com](http://TopDogServices.com)

## WHY USE SALT-X?

Salt! Without it we cannot live, though there are times when we all wish we could. Those who live in a salt environment, whether it is along the coast or in the snow belt, know firsthand the headaches salt can cause by corroding virtually anything it touches. Finding a way to fight salt damage is a real challenge.

Enter Salt-X: a super concentrated rinsing and flushing agent whose sole purpose is to remove salt. Customers that have made Salt-X a simple part of their maintenance routine are seeing tremendous cost savings by eliminating damages resulting from salt build-up.

### HOW DOES IT WORK?

When applied to surfaces, Salt-X finds its way into each crack and crevice, dissolving salt crystals, thereby stopping the corrosion process. Salt-X also contains a corrosion inhibitor compound that actually leaves a dry, non-oily coating to further protect surfaces against salt exposure.

An excellent example of Salt-X at work is in marine engine cooling system flushes. Once marine engines are powered off, salt remains and builds up in the cooling system. When Salt-X is used as a flush, it travels through the galleries of the engine, destroying this salt build-up.

And not just for marine use – Salt-X can be safely applied to any part of your car, truck, ATV, snow or seasonal outdoor-related equipment, without leaving any white residue. It is water soluble, non-oil based and environmentally safe. Used regularly, it lengthens the life of your valuable assets while also ensuring performance is not sabotaged by corrosive salt build-up.

Repeated use of Salt-X by commercial, industrial and military customers have shown that, when used regularly as part of a daily and or weekly scheduled preventive maintenance program, Salt-X removes even the harshest build-up of salt and salt film from all types of surfaces, without harming paints, oils, greases, fabrics, rubber items, plastics etc. thereby adding years to the useful life of the equipment.

## SALT-X APPLICATIONS

### WHO USES SALT-X?

You will find Salt-X widely used in the private and public sector, personally and industrially. A sample list of users follows:

- US Canadian Coast Guard
- V-Dot
- US Military
- Snow & Ice Management Contractors
- Commercial and recreational boating operators
- Commercial fishing and aquaculture operations
- Mining and construction industry
- Municipal and public works divisions
- Property Management Companies

### HOW TO USE SALT-X

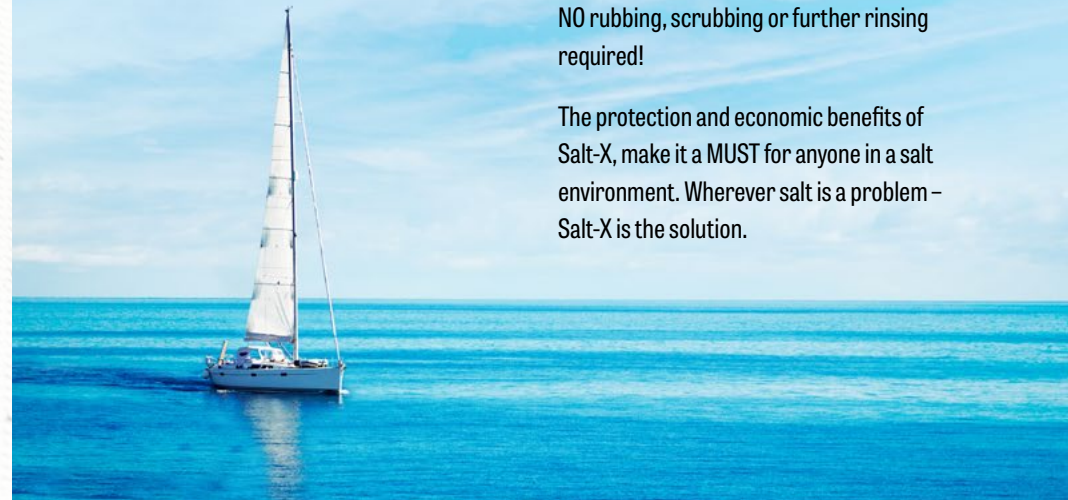

Salt-X is a concentrated rinsing and flushing agent designed exclusively for the removal of salt residue and crystals from virtually any surface! As aggressive as Salt-X is in removing even the harshest build up, laboratory tests have proven Salt-X to be non toxic and environmentally safe. And it is very easy to use:

- For personal and general marine usage – spray Salt-X and let dry
- For industrial usage and/or more significant grime or snow build-up:

1. Wash or pressure wash the surface (depending on amount of build-up)
2. Then mix 2oz of Salt-X per gallon of water
3. Spray the entire surface thoroughly
4. Leave to air dry

**NO rubbing, scrubbing or further rinsing required!**

The protection and economic benefits of Salt-X, make it a **MUST** for anyone in a salt environment. Wherever salt is a problem – Salt-X is the solution.

## NEW SALT-X AUTO-MIX HOSE SPRAYER!

The Salt-X Auto Mix Sprayer is a top of the line sprayer that provides a control knob with three settings (H<sub>2</sub>O, Off, Mix). For ease of handling the unit comes with a Garden Hose Quick Disconnect. The Quick Disconnect can be removed and the garden hose screwed directly into the sprayer. The f-style bottle is reusable and comes filled with 32oz of Salt-X Concentrate. The perfect size to carry on your boat or personal watercraft as well as in your car or truck.

### FEATURES

The Salt-X Auto Mix Stream/Fan Sprayer provides a concentrated stream and even flow. One knob controls both water and product flow. The dip tube and bottle seal are included for use. A Custom mixture rate of 64:1 (2 ounce Salt-X to 1 Gallon of Water) ensures the Salt-X and water is mixed automatically to provide cost effective mixture distribution. The tamper-proof closure prevents any accidental leaks and spills. The Salt-X Auto Mix Stream/Fan Sprayer is a high quality sprayer coupled with a 32 ounce f-style bottle that can be reused over and over again and refilled with our Salt-X Gallon Bottle.

### AUTO MIX HOSE SPRAYER

\$29.95

Yields 16 Gallons of product for \$1.87/Gallon.

### SALT-X 1 GALLON

\$31.95

Yields 64 Gallons of product for \$0.49/Gallon.

### SALT-X 5 GALLON PAIL

\$50.00

Pre-Mixed / Ready to Use

### SALT-X 5 GALLON PAIL

\$134.95

Yields 325 Gallons of product for \$0.41/Gallon.

### SALT-X 55-GALLON DRUM

\$1,195.00

Yields 3,575 Gallons of product for \$0.33/Gallon.

## EXTRA-STRENGTH SALT-X SALTBUSTER!

### ABOUT SALT-X SALTBUSTER

Salt-X Saltbuster was designed to take advantage of the Salt-X technology by combining a general purpose detergent with Salt-X. The result was an industrial cleaner/wash that not only removes mild to medium soils, grease, oil, and hydrocarbons but also removes even the harshest of salt buildup!

Fresh water (which contains chlorine) and ordinary soaps (which for the most part contain salt as a building agent) will not remove stubborn salt film from surfaces. This film is the first stage of corrosion! Salt-X Saltbuster works quickly to deactivate, dissolve and remove this film, thus extending the usable life of any surface exposed to salt.

A unique corrosion inhibitor in Salt-X Saltbuster actually leaves a dry, non-oily coating to help protect temporarily against further salt exposure. Repeated use in the field by retail, industrial and military customers have shown that when used regularly as part of a daily or weekly Preventive Maintenance program, Salt-X Saltbuster can also add years to the useful life of equipment.

### HOW TO USE SALT-X SALTBUSTER

Mix 8oz (236 ml) Salt-X Saltbuster per gallon of water. Wet surface liberally, let sit for 5 minutes, scrub if necessary and rinse with fresh water. Salt-X Saltbuster should be applied by hand, mop, sponge, brush or foam gun. For maximum results, use Salt-X Saltbuster each time equipment is exposed to salt and salt water.

For removing Salt Residue from Commercial Flooring, Boat & Ship decks:

1. Sweep the floor of any granulated salt and other debris
2. Mix Salt-X Saltbuster in your mop bucket or floor scrubber.
3. Apply the solution to the floor or boat deck and let it sit for 5 minutes.
4. Pick up the solution with mop, wet/dry vacuum or floor scrubber.
5. Repeat Steps 1-4 if there is still salt residue on the floor.
